John Howard Association

Statistical Profile of IDOC's Mandatory Supervised Release/Parole Population as of 12/31/2020

Table of Contents

Introduction

The following information is based upon the Illinois Department of Corrections (IDOC) Parole Population Data Set for December 31, 2020 that is accessible to the public on the IDOC website [here](#).

The John Howard Association of Illinois (JHA) analyzed the information contained within the data set to create a profile of the Mandatory Supervised Release (MSR)/Parole population of IDOC to increase the public's understanding about the people who are under IDOC supervision in the community following release from prison as of December 31, 2020. We also used the IDOC data set to generate charts and graphs representing nuanced breakdowns of information related to IDOC's MSR population and make comparisons between IDOC's MSR and prison populations and the MSR population over time (2016 through 2020).

The IDOC Parole Data Set was processed by JHA staff using IBM's SPSS statistics software. Most of the information in the data set was transformed into the variables presented herein. [Details concerning terms and methodology can be found here](#). Also, detailed information (individual-level data) contained within some categories presented herein [can be found here](#).

Section One: Summary of the Demographic Characteristics of the MSR/Parole Population as of December 31, 2020 (n = 23,355)

1. Age of People on MSR as of December 31, 2020 (n = 23,354*)
* One person in the IDOC data set does not have a date of birth listed and is therefore not included in the graph above.

The average age of a person on MSR as of December 31, 2020 was 37.82 years old, and the age of these people ranged from 18 to 90 years old. Although the average age was 37.82, only 14.95% of people were in the '36 to 40' age bracket. Approximately half (49.14%) of IDOC's MSR population were 35 or younger, and the majority (56.82%) of these people were between their late teens (18+) and late 20's (up to 29). Also, approximately one-third (35.91%) of IDOC's MSR population were 41 or older, and nearly half (47.56%) of these people were 50 or older.

2. Estimated Age at Custody* (n = 23,354**)***
Bar chart with the following values:
- 17 and Under: 491 / 2.10%
- 18 to 24: 5877 / 25.16%
- 25 to 29: 4420 / 18.93%
- 30 to 35: 4386 / 18.78%
- 36 to 40: 2717 / 11.63%
- 41 to 49: 3245 / 13.89%
- 50 and Over: 2218 / 9.50%

* Estimated age at custody represents a person's age when they were likely taken into custody by law enforcement for their holding offense.

** One person in the IDOC data set does not have a date of birth listed and is therefore not included in the graph above.

*** Of the 491 people who were 17 and under at time of custody, 8 were transferred from IDJJ to IDOC MSR supervision.

The estimated age of a person on MSR when they were taken into custody for their holding offense (also likely age at time offense was committed) was 32.73 years old on average and ranged from 13 to 83 years old. Of IDOC's MSR population, 46.19% were 29 or younger when taken into custody for their holding offense, and most (59.03%) of these people were under the age of 24. Only 18.78% of people were in the '30 to 35' age bracket in which the estimated age at custody average is included. Also, over one-third (35.02%) of people on MSR were 36 or older when they were taken into custody for their holding offense.

3. Age at Release [from prison] (n = 23,346*)
Bar chart showing age at release from prison:
- 18 to 24: 2862 (12.26%)
- 25 to 29: 4544 (19.46%)
- 30 to 35: 4874 (20.88%)
- 36 to 40: 3385 (14.50%)
- 41 to 45: 2537 (10.87%)
- 46 to 49: 1568 (6.72%)
- 50 to 55: 1829 (7.83%)
- 56 to 64: 1416 (6.07%)
- Over 65: 331 (1.42%)

* The graph above does not include one person whose date of birth is not listed in the IDOC data set and 8 people who were transferred directly from IDJJ supervision to IDOC's MSR population.

The age of a person on MSR upon release from prison was 36.75 years old on average and ranged from 17 to 86 (n = 23,354). Of IDOC's MSR population, 15.31% were 50 or older upon release from prison. Only 14.50% of people were in the '36 to 40' age bracket in which the average age at release is included. Over half (52.58%) of IDOC's MSR population were 35 or younger upon release, and most (60.31%) of these people were 29 or younger.

4. Estimated Age at Discharge [from MSR] (n = 23,354*)
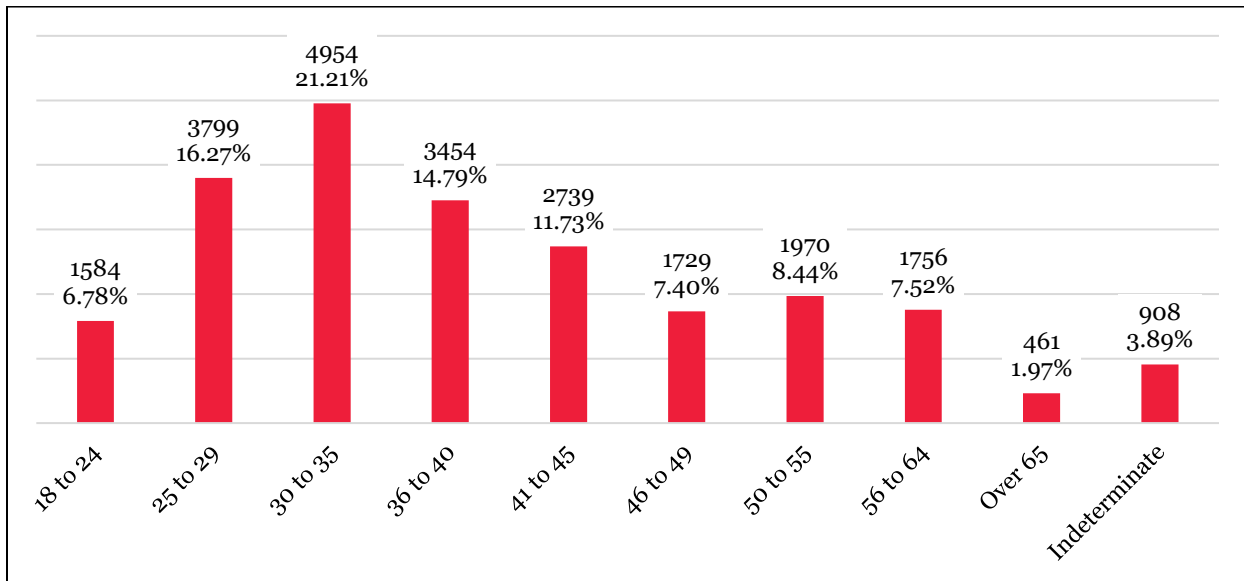

* The graph above does not include one person whose date of birth is not listed in the IDOC data set.

Estimated age at discharge indicates the age a person should be upon discharged from MSR status, meaning they will no longer be under the supervision of IDOC in the community. Of the people on MSR who have a projected discharge date (n = 22,446), the age a person should be upon discharge from MSR will be 38.72 years on average if the range is limited to 18 to 100 years old (n = 22,423). Over two-fifths (44.26%) of IDOC's MSR population should be 18 to 35 years old upon discharge, and over half (52.08%) of these people should be 29 or younger upon discharge.

5. Gender (n = 23,355)

Male: 21370 / 91.50%

Female: 1985 / 8.50%

6. Race* (n = 23,355)

Black: 12407 / 53.12%

White: 7646 / 32.74%

Hispanic: 3071 / 13.15%

Other: 231 / 0.99%
* In this instance, the following IDOC racial categories were condensed into 'Other': American Indian, Asian, Bi-Racial, and Unknown.

Section Two: Summary of Legal Characteristics of the MSR/Parole Population as of December 31, 2020

7. IDOC Admission Types* (n = 23,355)

Category	Value
Transferred from juvenile	50
Technical parole violator	2
Technical MSR violator	2703
Return to Custody	2
Return additional mittimus	107
Parole violator, New sentence	11
Not in IDOC custody	62
Northern Co Jail Adm	51
MSR violator, New sentence	1596
Menard Co Jail Adm	8
Logan Co Jail Adm	9
Juv parole to adult parole	8
Graham Co Jail Adm	14
Discharged & recommitted	9118
Direct from court	9274
COVID 19 - Admit from County	161
Cook County Admission	125
Conditional Release Violator	1
Admit from other custody	53

* The IDOC Admission Types mirror the figures reported in the IDOC data set.

Of the 23,355 people on MSR, 368 (1.58%) were placed onto MSR status without being transferred to an IDOC prison. These people completed the custodial part of their court-imposed prison term in a county jail and were subsequently placed into IDOC custody as individuals on MSR status. The overwhelming majority (98.42%) of people were released from an IDOC facility onto MSR status.

8. Admission Type—Recidivism* (n = 23,355)
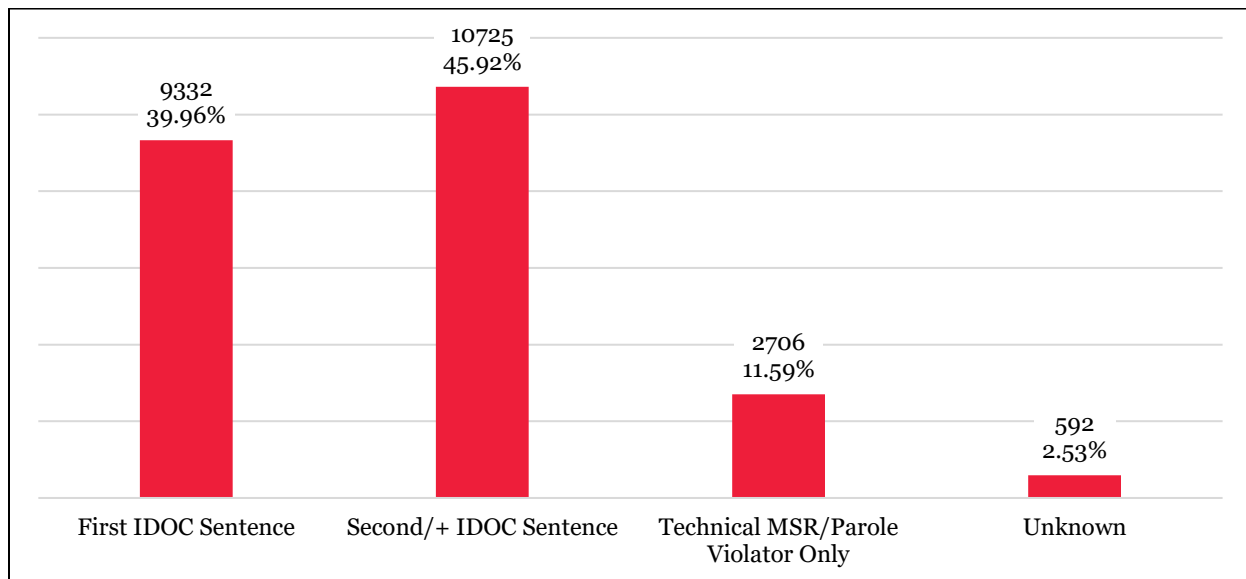

* Categories within the above graph were created by JHA using IDOC admission types. Details as to IDOC admission types used to create these categories can be found here.

9. JHA Offense Type of Holding Offense* (n = 23,355)
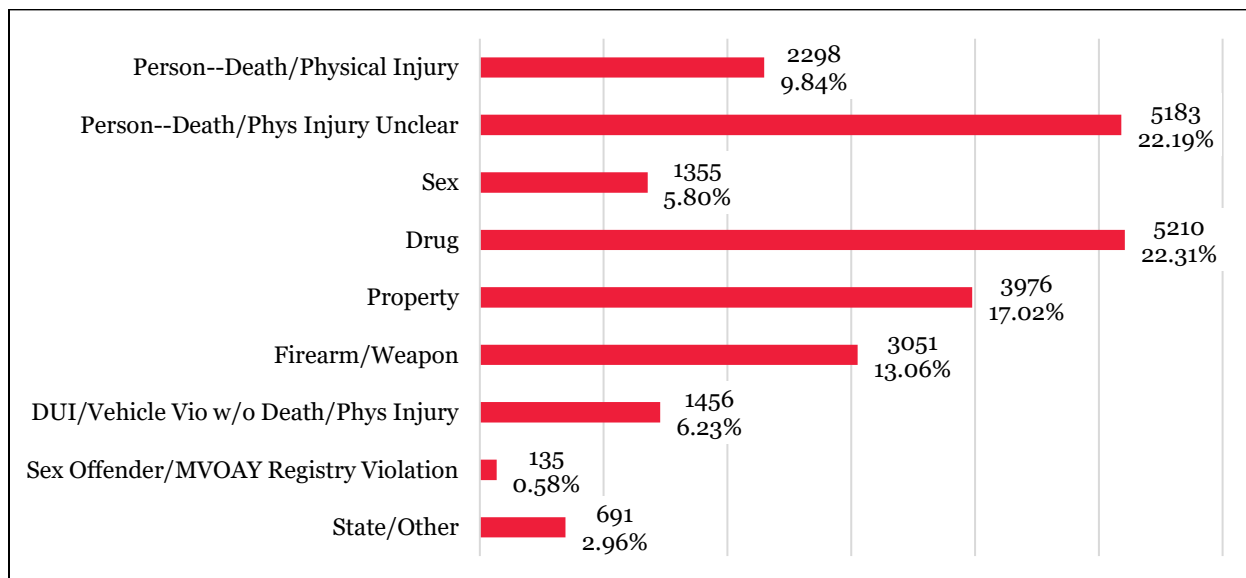

* Categories within the above graph were created by JHA using individual offenses as listed within the IDOC data set. The definition of each JHA offense type category can be found here. A listing of individual offenses included within each JHA created offense type can be found here.

The graph above demonstrates that under one-third (32.03%) of people on MSR status have a 'Person' offense listed as their holding offense by IDOC, and less than one-third (30.72%) of these

people are on MSR for a 'Person' offense resulting in death or physical injury as indicated by the statutory language or court finding associated with the holding offense. People whose holding offense was classified by JHA as a 'Drug' or 'Property' offense combine to make up 39.33% of the MSR population. These offense types are considered by most criminal justice practitioners to be less serious than 'Person' or 'Sex' offenses.

10. Felony Class of Holding Offense (n = 23,337*)
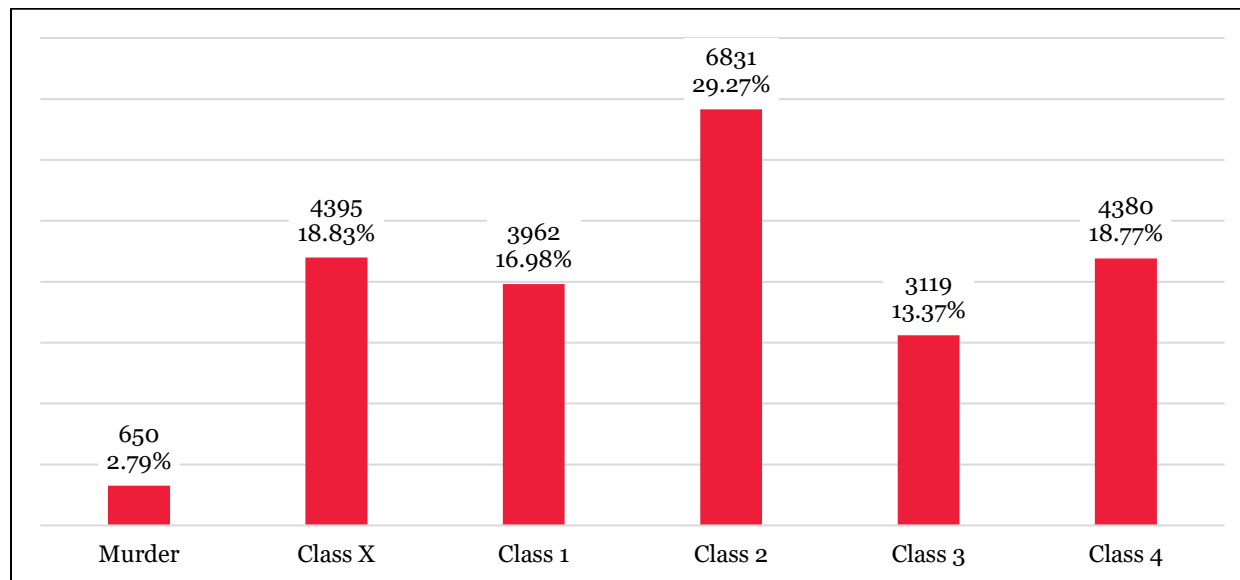

* Unclassified people are not included in the graph above. All are SDP's (n = 18).

The largest group of people on MSR status are those whose holding offense is a Class 1 or 2 felony (46.25%). Approximately one-third (32.13%) of people on MSR's holding offense are either Class 3 or 4 felonies. Approximately one-fifth (21.62%) of people on MSR's holding offenses are either Class M (murder) or Class X. Typically, the length of a person's MSR term is determined by the felony class of their holding offense according to statute (730 ILCS 5/5-8-1 (d)). The standard MSR terms by Felony Class as of December 31, 2020 are as follows:

- Class M and X: 3 years
- Class 1 and 2: 2 years
- Class 3 and 4: 1 year

11. Length of Court-Imposed Prison Sentence for Holding Offense (n = 23,317*)
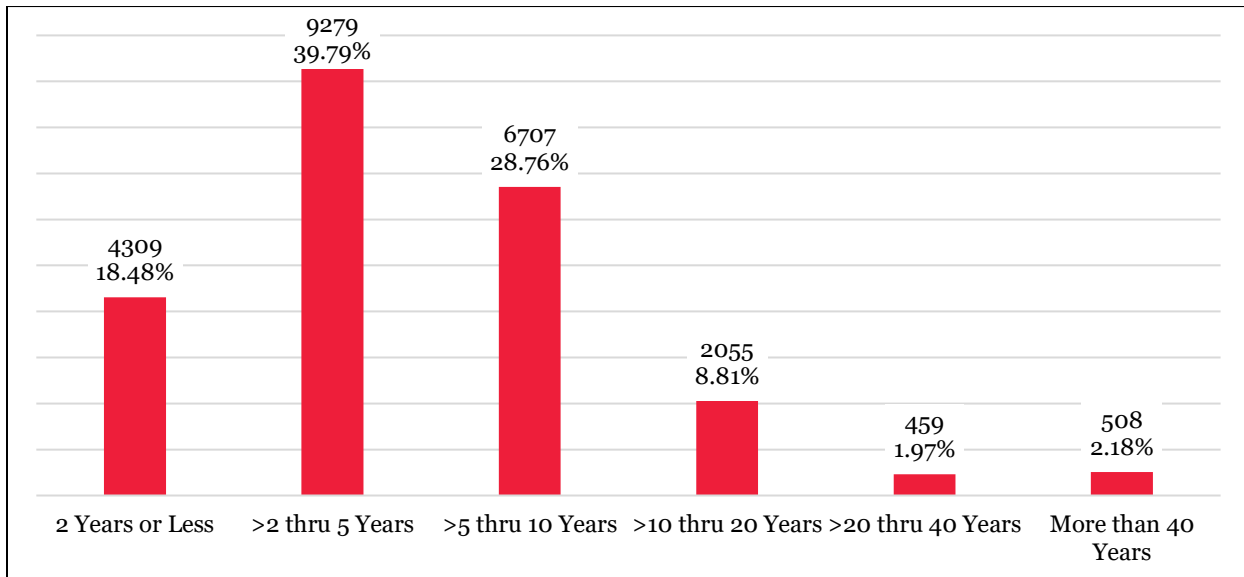

* There are 38 people on MSR who are not included in the graph above: those who are SDP's (n = 18) and those who were serving a court-imposed sentence of imprisonment for life that was commuted by the Governor of Illinois (n = 20).

The average length of the custodial part of the court-imposed sentence that was served by a person prior to them being released from a prison onto MSR status is 6.81 years and the median length of court-imposed sentence is 4 years if the range of court-imposed sentences is limited to 1 through 100 years (n = 23,281). As court-imposed sentences within the 1 through 100 year range are not normally distributed (skewness: 4.45; kurtosis: 25.10), the proper measure of central tendency to use in this instance is the median of 4 years.

The majority (58.28%) of people on MSR received a court-imposed sentence of less than 5 years of imprisonment followed by a term of MSR. Approximately one-quarter (28.76%) received a court-imposed prison sentence ranging between 5 to 10 years. The remaining 12.96% of people on MSR received a court-imposed prison sentence of greater than 10 years. The overwhelming majority (99.86%) of the 13,588 of people on MSR who received a court-imposed sentence of 5 years or less were imprisoned for a Class 1 through 4 felony offense, most of which are probationable (i.e., a prison sentence was not mandatory).

12. Estimated Length of Court-Imposed Prison Sentence for Holding Offense After "Truth in Sentencing" Multiplier Applied* (n = 23,317**)

A bar chart showing the estimated length of court-imposed prison sentence after the "Truth in Sentencing" multiplier is applied:

- 2 Years or Less: 11414 (48.95%)
- >2 thru 5 Years: 7286 (31.25%)
- >5 thru 10 Years: 3102 (13.30%)
- >10 thru 20 Years: 960 (4.12%)
- >20 thru 40 Years: 510 (2.19%)
- More than 40 Years: 45 (0.19%)

* The "Truth in Sentencing" multiplier is determined by law based on the holding offense (730 ILCS 5/3-6-3). A person may be required to serve 100%, 85%, 75%, or 50% of the custodial part of their court-imposed prison sentence preceding a MSR term. Thus, the multipliers are 1, .85, .75, and .5 respectively. A person whose sentence is calculated at 75% or 50% may earn sentencing credits that may reduce the time they are imprisoned for their holding offense. Conversely, a person whose sentence is calculated at 85%, 75%, or 50% may have been required to serve up to 100% of their court-imposed sentence if they had "good time" revoked for violating IDOC rules. Please note that most people are simultaneously serving multiple court-imposed prison sentences, concurrently or consecutively, and this may affect the "Truth in Sentencing" multiplier.

** There are 38 people on MSR who are not included in the graph above: those who are SDP's (n = 18) and those who were serving a court-imposed sentence of imprisonment for life that was commuted by the Governor of Illinois (n = 20).

The average length of the custodial part of the court-imposed sentence that was served by a person prior to them being released onto MSR status after the "Truth in Sentencing" (TIS) multiplier is applied is 3.90 years and the median length is 2.25 years if the range of court-imposed sentences after the TIS multiplier is applied is limited to 6 months through 100 years (n = 23,307). Thus, after the TIS multiplier is applied to JHA's "Length of Court-Imposed Prison Sentence for Holding Offense" variable, the average length of sentence decreased by 42.73% and the median length of sentence decreased by 43.75% for people included in this MSR population dataset overall. As court-imposed sentences after the TIS multiplier is applied within the 6 months through

100-year range is not normally distributed (skewness: 6.46; kurtosis: 74.85), the proper measure of central tendency to use in this instance is the median of 2.25 years.

The difference in the proportion of people in the brackets represented in graph 11 compared to graph 12 is likely explained by the existence of a correlation between TIS and length of court-imposed sentence. People who are subjected to a court-imposed sentence of 10 years or less are more likely to have their sentence calculated by IDOC at "day-for-day" (i.e., 50%) by operation of law upon admission to IDOC, while people who are serving harsher court-imposed sentences (longer than 10 years) are more likely to have their sentence calculated by IDOC at 85% or 100% by operation of law upon admission to IDOC.

Comparing the graphic above to the graph representing length of court-imposed sentence alone (Graph 11), there is a substantial increase of the proportion of people who fall into the '2 years or less' bracket after TIS was factored into length of court-imposed sentences (48.95% versus 18.48%). Thus, after TIS was factored into the length of the custodial part of the court-imposed sentence preceding a person's MSR term, nearly half (48.95%) of people on MSR were actually sentenced to serve 2 years or less in prison.

13. Length of Time Served in Prison/Jail for Holding Offense Prior to MSR (n = 23,355)
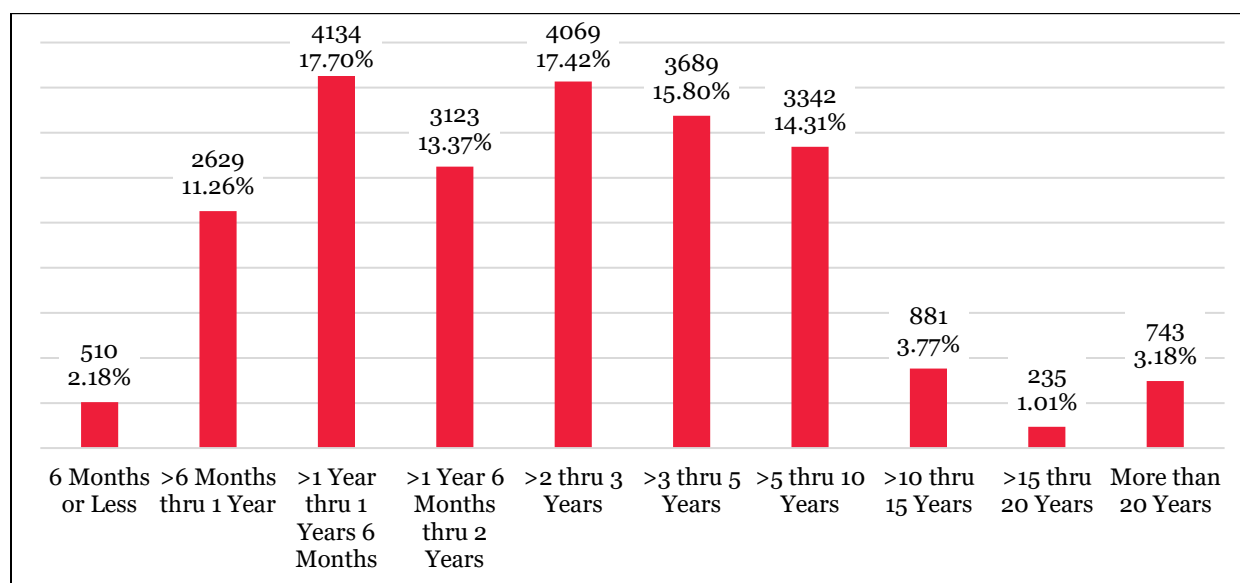

The average number of months a person on MSR was incarcerated prior to release is 48.35 (appx. 4 years) and the median number of months incarcerated is 27.32 months (appx. 2 years, 3 months). As the length of time people on MSR were incarcerated in a prison and/or jail for their holding offense prior to MSR in months is not normally distributed (skewness: 3.60; kurtosis: 16.47), the proper measure of central tendency to use in this instance is the median of 27.32 months.

14. Subject to "Truth in Sentencing" for Holding Offense (n = 23,317*)
* There are 38 people on MSR who are not included in the graph above, those who are SDP's (n = 18) and those who were serving a court-imposed sentence of imprisonment for life that was commuted by the Governor of Illinois (n = 20).
** People subject to 50% (i.e., day-for-day) or 75% TIS may earn sentencing credits reducing the amount of time they are imprisoned. Also, these people may serve more than 50% or 75% of their sentences respectively as the result of being sanctioned for a serious IDOC rule violation and other factors.
*** People subject to 85% or 100% TIS are prohibited by law from earning sentence credits that will result in a reduction of their court-imposed sentence. People required to serve 85% of their sentence may serve more than 85% as the result of being sanctioned for a serious IDOC rule violation and other factors. People under 100% TIS and cannot have their sentence extended because they have no "good time" that can be revoked.

A large majority (87.04%) people on MSR were required to serve 50% (i.e., day-for-day) of the custodial part of their court-imposed sentence. Less than one percent of people on MSR were under 100% TIS while serving the custodial part of their court-imposed prison sentence.

15. Time Served on MSR as of 12-31-2020 (n = 22,949*)

Category	Count	Percentage
More than 4 Years	197	0.86%
3 to 4 Years	280	1.22%
2 Years 6 Months up to 3 Years	854	3.72%
2 Years up to 2 Years 6 Months	1113	4.85%
1 Year 6 Months up to 2 Years	2716	11.83%
1 Year up to 1 Year 6 Months	3545	15.45%
6 Months up to 1 Year	7249	31.59%
Under 6 Months	6995	30.48%
* 406 people identified whose projected discharge date occurred prior to December 31, 2020 are not included in the graph above.

Of the people on MSR status who meet the condition of having a projected discharge date that occurs after December 31, 2020 (n = 21,949), the average number of months of MSR they have served is 12.24 (appx. 1 year) and the median number of months of MSR they have served is 9.63 months. As time served by people on MSR in months is not normally distributed (skewness: 8.02; kurtosis: 211.68), the proper measure of central tendency to use in this instance is the median of 9.63 months.

Of the people on MSR status who meet the condition of having a projected discharge date that occurs after December 31, 2020, the majority (62.07%) have served less than one year of MSR after release from prison, nearly a one-fourth (27.28%) have served one year to two years of MSR, and the remaining 10.65% have served more than two years of MSR.

16. Estimated Time Until Discharge from MSR* (n = 23,355)

Chart data (horizontal bar chart):

Category	Count	Percent
Indeterminate	908	3.89%
More than 4 Years	49	0.21%
3 to 4 Years	656	2.81%
2 Years 6 Months up to 3 Years	1514	6.48%
2 Years up to 2 Years 6 Months	1532	6.56%
1 Year 6 Months up to 2 Years	3433	14.70%
1 Year up to 1 Year 6 Months	3625	15.52%
6 Months up to 1 Year	5598	23.97%
Under 6 Months	5634	24.12%
Negative Value	406	1.74%
* People included in the Negative Value category include people whose projected discharge date occurs prior to December 31, 2020.

Of the people on MSR status who meet the condition of having a projected discharge date that occurs after December 31, 2020 (negative values in the graph above), not serving an indeterminate MSR term, or a person whose discharge date is not beyond four years (n = 21,992), the average number of months until they may be discharged from MSR is 14.22 (appx. 1 year and 2 months) and the median number of months until they may be discharged from MSR is 11.70 months (appx. 1 year).

Of the total number of people on MSR (n = 23,355), 11,232 (48.09%) of these people should have less than one year of remaining on their MSR term, while 11,717 (50.17%) should have one year or more remaining on their MSR term.

17. County Where Person was Sentenced for Holding Offense—Regional* (n = 23,355)

Region	Count	Percentage
Cook	10352	44.32%
Chicago Metro--Suburbs	3091	13.23%
St. Louis Metro--Suburbs	1120	4.80%
North IL--N of I80	2447	10.48%
Central IL--Btwn I80 & I70	4692	20.09%
South IL--S of I70	1653	7.08%
* A listing of counties included in each region can be found here.

18. County Where Person on MSR Resides—Regional* (n = 23,355)

Region	Count	Percentage
Cook	10064	43.09%
Chicago Metro--Suburbs	2402	10.28%
St. Louis Metro--Suburbs	1023	4.38%
North IL--N of I80	2080	8.91%
Central IL--Btwn I80 & I70	4729	20.25%
South IL--S of I70	1389	5.95%
Out of State	1668	7.14%
* A listing of counties included in each region can be found here.

19. County of Residence—Sentencing County Match (n = 23,355)
Of the MSR population, 8,071 (34.56%) people did not reside in the county in which they were sentenced for their holding offense as of December 31, 2020, while the majority (65.44%) did reside in the county in which they were sentenced for their holding offense as of December 31, 2020.

The following is a regional breakdown of the 8,071 people on MSR who resided in a county other than the county in which they were sentenced, meaning they either relocated to the region* indicated below after release from prison or resided in the indicated region prior to being sentenced in another region for their holding offense:

- Cook: 1,518 (18.81%)
- Chicago Metro—Suburbs: 1,032 (12.79%)
- St. Louis Metro—Suburbs: 329 (4.08%)
- Northern IL—North of I-80: 786 (9.74%)
- Central IL—Between I-80 & I-70: 2,113 (26.18%)
- Southern IL—South of I-70: 625 (7.74%)
- Out of State: 1,668 (20.67%)

* A listing of counties included in each region can be found here.

Section Three: Comparison of IDOC's Static MSR and Prison Populations as of December 31, 2020

The graphs contained within this section illustrates the similarities and differences between the IDOC MSR and prison populations by using the IDOC prison population as of December 31, 2020 as a comparison group.

20. Age of People in Prison versus People on MSR* as of December 31, 2020

	18 to 24	25 to 29	30 to 35	36 to 40	41 to 45	46 to 49	50 to 55	56 to 64	65 and Older
Prison Pop (n=29111)	7.96%	15.51%	18.79%	15.25%	12.67%	9.72%	7.55%	8.89%	3.65%
MSR Pop (n=23354)	9.44%	18.49%	21.22%	14.95%	11.52%	7.31%	8.29%	6.93%	1.85%
* Percentages in each row (Prison Pop & MSR Pop) total to 100%

21. Estimated Age at Custody* of People in Prison versus People on MSR**
	17 and Under	18 to 24	25 to 29	30 to 35	36 to 40	41 to 49	50 and Over
Prison Pop (n=29111)	4.00%	30.00%	18.04%	17.16%	10.99%	11.73%	8.09%
MSR Pop (n=23354)	2.10%	25.16%	18.93%	18.78%	11.63%	13.89%	9.50%

* Estimated age at custody represents a person's age when they were likely taken into custody by law enforcement for their holding offense.

** Percentages in each row (Prison Pop & MSR Pop) total to 100%

22. Estimated Age at Release of People in Prison* versus Age at Release [from prison] of People on MSR**

	18 to 24	25 to 29	30 to 35	36 to 40	41 to 45	46 to 49	50 to 64	65 to 79	80 and Over	Life	Unknown
Prison Pop (n=29111)	4.03%	10.36%	14.55%	11.43%	10.40%	7.05%	19.73%	9.24%	6.43%	5.29%	1.47%
MSR Pop (n=23352)	12.28%	19.46%	20.87%	14.50%	10.86%	6.71%	13.90%	1.37%	0.04%	0.00%	0.00%
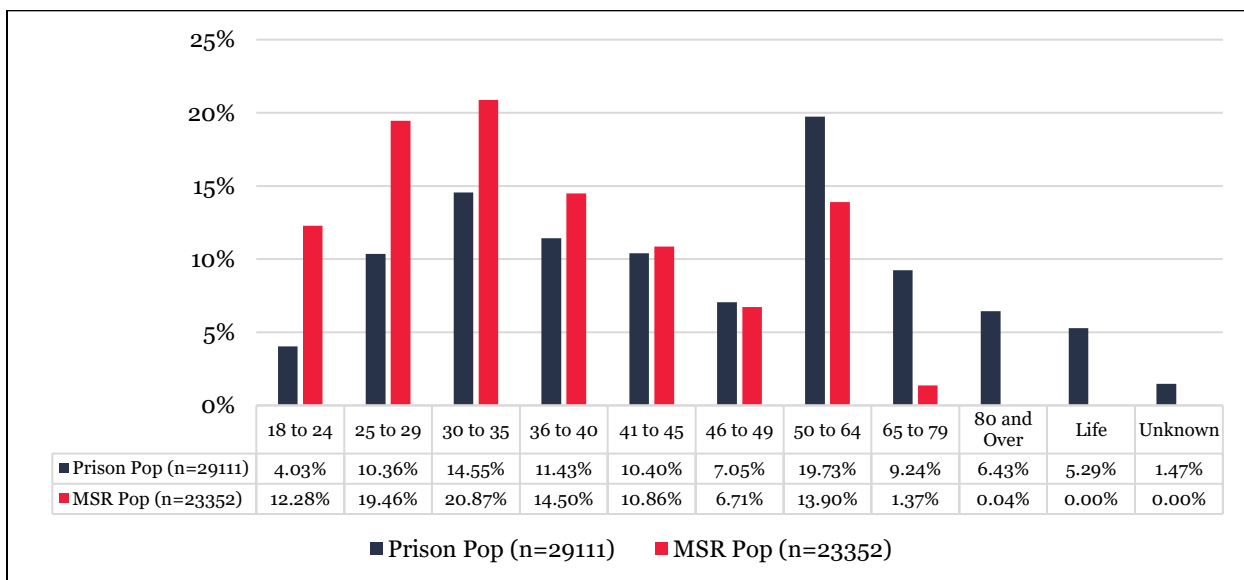

* Estimated age at release represents how old a person should be when released from prison; the 'Unknown' category includes people in prison who do not have a Projected MSR or Discharge date listed by IDOC and SDPs (people who are civilly committed to IDOC custody as a Sexually Dangerous Person—they do not have determinate release dates).

** Percentages in each row (Prison Pop & MSR Pop) total to 100%

23. Gender of People in Prison versus People on MSR*

	Female	Male
Prison Pop (n=29111)	4.85%	95.15%
MSR Pop (n=23355)	8.50%	91.50%
* Percentages in each row (Prison Pop & MSR Pop) total to 100%

24. Race of People in Prison versus People on MSR*

	Black	White	Hispanic	Other
Prison Pop (n=29111)	54.36%	31.72%	13.06%	0.86%
MSR Pop (n=23355)	53.12%	32.74%	13.15%	0.99%
* Percentages in each row (Prison Pop & MSR Pop) total to 100%

25. IDOC Admission Types of People in Prison versus People on MSR*

	Admit from other custody	Conditional Release Violator	Cook County Admission	Direct from court	Discharged & recommitted	Graham Co Jail Adm	Juv parole to adult parole	Logan Co Jail Adm	Menard Co Jail Adm	MSR violator, New sentence	Northern Co Jail Adm	Not in IDOC custody	Parole violator, New sentence	Return additional mittimus	Return to Custody	Technical MSR violator	Technical parole violator	Transferred from juvenile	COVID-19 County Admit
■ Prison Pop (n=29111)	0.32%	0.05%	0.00%	44.48%	35.27%	0.00%	0.00%	0.00%	0.00%	4.97%	0.00%	0.00%	0.12%	2.24%	0.01%	8.54%	0.03%	0.42%	3.55%
■ MSR Pop (n=23355)	0.23%	0.00%	0.54%	39.71%	39.04%	0.06%	0.03%	0.04%	0.03%	6.83%	0.22%	0.27%	0.05%	0.46%	0.01%	11.57%	0.01%	0.21%	0.69%

■ Prison Pop (n=29111) ■ MSR Pop (n=23355)

* Percentages in each row (Prison Pop & MSR Pop) total to 100%

26. Admission Type—Recidivism of People in Prison versus People on MSR*

	First IDOC Sentence	Second/+ IDOC Sentence	Technical MSR/Parole Violator Only	Unknown
■ Prison Pop (n=29111)	44.90%	40.36%	8.54%	6.20%
■ MSR Pop (n=23355)	39.96%	45.92%	11.59%	2.53%
* Percentages in each row (Prison Pop & MSR Pop) total to 100%

27. JHA Offense Type of Holding Offense of People in Prison versus People on MSR*

	State/Other	Sex Offender/MVOAY Registry Violation	DUI/Vehicle Vio w/o Death/Phys Injury	Firearm/Weapon	Property	Drug	Sex	Person--Death/Phys Injury Unclear	Person--Death/Physical Injury
■ Prison Pop (n=29111)	1.25%	1.40%	1.69%	6.88%	8.47%	10.21%	16.84%	22.35%	30.91%
■ MSR Pop (n=23355)	2.96%	0.58%	6.23%	13.06%	17.02%	22.31%	5.80%	22.19%	9.84%

■ Prison Pop (n=29111)   ■ MSR Pop (n=23355)
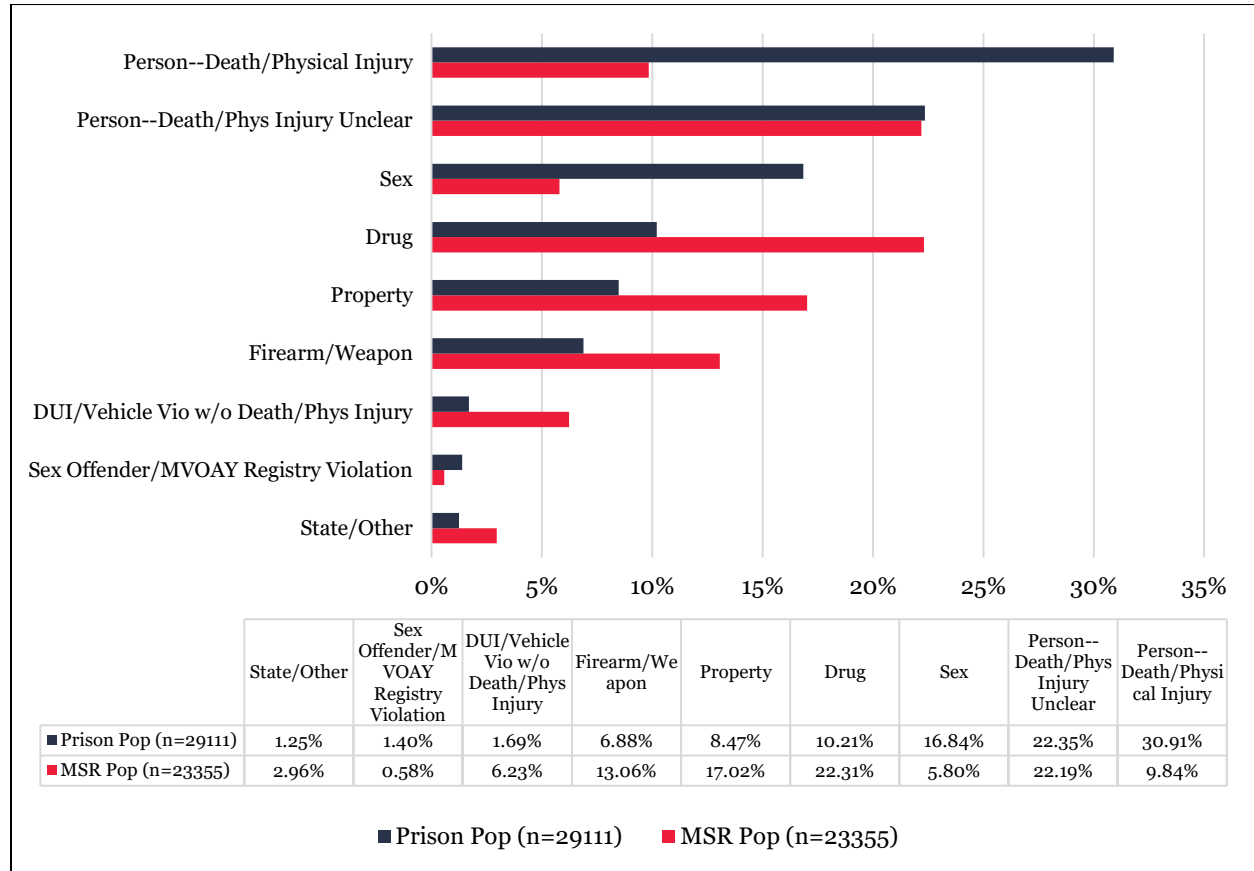

* Percentages in each row (Prison Pop & MSR Pop) total to 100%

28. Felony Class of Holding Offense of People in Prison* versus People on MSR**
	Murder	Class X	Class 1	Class 2	Class 3	Class 4
■ Prison Pop (n=28951)	22.04%	36.10%	13.60%	16.87%	6.83%	4.56%
■ MSR Pop (n=23337)	2.79%	18.83%	16.98%	29.27%	13.37%	18.77%

* People in prison (n=160) and people on MSR (n=18) who are unclassified are not included in the figures above. The majority (98.88%) of the unclassified people are Sexually Dangerous Persons civilly committed to IDOC custody.

** Percentages in each row (Prison Pop & MSR Pop) total to 100%

29. Length of Court-Imposed Prison Sentence for Holding Offense for People* in Prison versus People on MSR**

	2 Years or Less	>2 thru 5 Years	>5 thru 10 Years	>10 thru 20 Years	>20 thru 40 Years	More than 40 Years	Life
■ Prison Pop (n=28953)	3.48%	17.33%	25.67%	20.65%	16.73%	10.81%	5.32%
■ MSR Pop (n=23337)	18.46%	39.76%	28.74%	8.81%	1.97%	2.18%	0.09%
* People in prison (n=160) and people on MSR (n=18) who are unclassified are not included in the figures above. The majority (98.88%) of the unclassified people are Sexually Dangerous Persons civilly committed to IDOC custody.

** Percentages in each row (Prison Pop & MSR Pop) total to 100%

30. Estimated Length of Court-Imposed Prison Sentence for Holding Offense After "Truth in Sentencing" Multiplier Applied* for People** in Prison versus People on MSR***

	2 Years or Less	>2 thru 5 Years	>5 thru 10 Years	>10 thru 20 Years	>20 thru 40 Years	More than 40 Years	Life
■ Prison Pop (n=28953)	14.67%	21.24%	19.31%	17.09%	15.24%	7.14%	5.32%
■ MSR Pop (n=23337)	48.91%	31.22%	13.29%	4.11%	2.19%	0.19%	0.09%

* The "Truth in Sentencing" multiplier is determined by law based on the holding offense (730 ILCS 5/3-6-3). A person may be required to serve 100%, 85%, 75%, or 50% of the custodial part of their court-imposed prison sentence preceding a MSR term. Thus, the multipliers are 1, .85, .75, and .5 respectively. A person whose sentence is calculated at 75% or 50% may earn sentencing credits that may reduce the time they are imprisoned for their holding offense. Conversely, a person whose sentence is calculated at 85%, 75%, or 50% may have been required to serve up to 100% of their court-imposed sentence if they had "good time" revoked for violating IDOC rules. Please note that most people are simultaneously serving multiple court-imposed prison sentences, concurrently or consecutively, and this may affect the "Truth in Sentencing" multiplier.

** People in prison (n=160) and people on MSR (n=18) who are unclassified are not included in the figures above. The majority (98.88%) of the unclassified people are Sexually Dangerous Persons civilly committed to IDOC custody.

*** Percentages in each row (Prison Pop & MSR Pop) total to 100%

Section Five: Detailed Profile of People on MSR as of December 31, 2020 by Age

Age represents the age of people on MSR on the day the IDOC data set was generated. The graph immediately following this paragraph illustrates the age of people, grouped into categories, for the entire population of people on MSR status under the supervision of IDOC in the community as of December 31, 2020. It is to be used as reference for comparisons between the size of these groups across the IDOC MSR population versus the size of these groups within the categories included in the graphs within this section. The reference graph below is identical to graph 1, but the groups are color coded to match how they are represented in the subsequent graphs within this section.

Age of People on MSR as of December 31, 2020 (n = 23,354*)
* One person in the IDOC data set does not have a date of birth listed and is therefore not included in the graph above or the graphs that follow in this section.

Section Six: Detailed Profile of People on MSR as of December 31, 2020 by Race

There are more racial identity values in the IDOC Parole Population data set dated December 31, 2020 than is represented by the JHA "Race" variable. We condensed the following racial identities into a single 'Other' category (n = 231), as the percentage of IDOC's MSR population represented by each is close to zero percent: American Indian, Asian, Bi-Racial, and Unknown. When generating bivariate tables and graphs presented in this profile, JHA does not use the 'Other' category due to the small number of people counted as 'Other' and the values included in the 'Other' category are unrelated.

To compare the racial composition of categories listed in the bivariate tables below, the racial composition of IDOC's MSR population with the 'Other' category excluded (n = 23,124) is as follows:

Race (n = 23,124)

Section Seven: Detailed Profile of People on MSR as of December 31, 2020 by JHA Offense Type

Offense Type indicates the nature of the criminal offense listed as a person's holding offense that resulted in their court-imposed prison sentence which is followed by a mandatory term of post-carceral supervision (MSR) in the community. JHA and IDOC do not use a uniform definition for offense types, as IDOC possesses more information about people on MSR and the criminal offenses that resulted in their incarceration than is made available to the public in the IDOC population data sets. JHA classifies criminal offenses by offense type using the plain language of the statute describing each offense and court findings (example: court finding of great bodily harm). For a description of each JHA Offense Type, see this document.

The graph immediately following this paragraph illustrates the Offense Type of people's holding offense, grouped into categories, for the entire population of people on MSR status under the supervision of IDOC in the community as of December 31, 2020. It is to be used as reference for comparisons between the size of these groups across the IDOC MSR population versus the size of these groups within the categories included in the graphs within this section. The reference graph below is identical to graph 9, but the groups are color coded to match how they are represented in the subsequent graphs within this section.

JHA Offense Type of Holding Offense* (n = 23,355)
Person--Death/Physical Injury: 2298, 9.84%
Person--Death/Phys Injury Unclear: 5183, 22.19%
Sex: 1355, 5.80%
Drug: 5210, 22.31%
Property: 3976, 17.02%
Firearm/Weapon: 3051, 13.06%
DUI/Vehicle Vio w/o Death/Phys Injury: 1456, 6.23%
Sex Offender/MVOAY Registry Violation: 135, 0.58%
State/Other: 691, 2.96%

* Categories within the above graph were created by JHA using individual offenses as listed within the IDOC data set.
A listing of individual offenses included within each JHA created offense type can be found here.

Section Eight: Detailed Profile of People on MSR as of December 31, 2020 by County Where Person on MSR Resides—Regional

County Where Person on MSR Resides—Regional reflects the region within Illinois where a person on MSR resided as of December 31, 2020.

The graph immediately following this paragraph illustrates the county where people on MSR reside, grouped into categories, for the entire population of people on MSR status under the supervision of IDOC. It is to be used as reference for comparisons between the size of these groups across the IDOC MSR population versus the size of these groups within the categories included in the graphs within this section. The reference graph below is identical to graph 18, but the groups are color coded to match how they are represented in the subsequent graphs within this section.

County Where Person on MSR Resides—Regional (n = 23,355)

Region	Count	Percent
Cook	10064	43.09%
Chicago Metro--Suburbs	2402	10.28%
St. Louis Metro--Suburbs	1023	4.38%
North IL--N of I80	2080	8.91%
Central IL--Btwn I80 & I70	4729	20.25%
South IL--S of I70	1389	5.95%
Out of State	1668	7.14%
* A list of counties by region can be found here.

This report was written by JHA staff. Media inquiries should be
directed to JHA's Executive Director Jennifer Vollen-Katz
at (312) 291-9555 x205 or jvollen@thejha.org

Incarcerated individuals can send privileged mail to report concerns and issues to the John
Howard Association, P.O. Box 10042, Chicago, IL 60610-0042. JHA staff are reading every
letter and tracking this information to monitor what is occurring behind prison walls and to
advocate for humane policies and practices. Family and friends can contact JHA via our website
www.thejha.org or by leaving a message at 312.291.9183 x208.

Since 1901, JHA has provided public oversight of Illinois' juvenile and adult correctional
facilities. Every year, JHA staff and trained volunteers inspect prisons, jails, and detention
centers throughout the state. Based on these inspections, JHA regularly issues reports that are
instrumental in improving prison conditions. JHA humbly thanks all the persons who agreed to
be interviewed for this report and who graciously shared their experiences and insights with us.

The John Howard Association was the proud recipient of the
2015 MacArthur Award for Creative and Effective Institutions
