Introduction

Robinson Correctional Center (Robinson) is a minimum-security male prison within the Illinois Department of Corrections (IDOC) that housed 974 people on March 27, 2023. The John Howard Association of Illinois (JHA) conducted a modified short [Measuring the Quality of Prison Life](#) (MQPL) survey by providing enough survey packets (consisting of the [MQPL survey](#), an informed consent notice/instruction sheet, and a privileged mail prepaid business reply envelope addressed to JHA) so that every person incarcerated at Robinson had an opportunity to participate in the voluntary and anonymous survey if they chose to do so. The survey was initially sent to Robinson for distribution in the Spring of 2023, as was done with other IDOC surveys. However, JHA only received ten returned surveys from Robinson via mail through September. Given this was an extremely low and unusual response rate, we assumed there had been some glitch in the return process, and thus redistributed surveys at Robinson at the time of our October 2023 monitoring visit. In total, JHA received 214 responses to the MQPL survey from people at Robinson through the end of 2023, representing approximately 22% of the static population.

The MQPL questions are organized by dimensions: harmony, professionalism, security, and well-being & development (descriptions on next page). JHA's survey also included questions on demographics of respondents as well as some questions JHA had asked in previous JHA surveys. Results are

presented in this report first in chart format, followed by table format. Tables are organized in the order that questions appeared on the survey.
